Search to look-up
archived reports and fax
to recipients.

All fax activity is tracked,
failed and successful.
Failed fax events can
automatically notify
operators.

Support for high-volume
fax needs with option for
multiple, simultaneous
transmissions.

Deliver Reports with Automatic Faxing

With FUSION Fax you can deliver facsimile copies of reports when and where you need them. Reduce the time, cost and equipment required to print while providing the advantage of near instant document distribution. FUSION Fax is available for new implementations or add it to any existing system.

Automated or On-Demand

Use site, department, report type and even provider preferences to create automated faxing rules. Detailed rules accommodate multiple fax destinations by day of the week for recipients. Transcriptionists remain focused upon report creation without attending to faxing or waiting for results. Authorized users can fax on-demand current or archived documents.

Tracked and Audited

Every fax job is queued, monitored and logged. Our exclusive Output Manager will detail the document, the copy, the sender, the recipient and date/stamps and Fusionus of the fax job. Failed fax events can alert a system operator for immediate attention.

Dynamic and Seamless

Combine FUSION Fax with the FUSION Sort Option to deliver unparalleled flexibility in fax delivery. Real-time faxing is enhanced with time-released fax events that batch all fax copies, pre-sorted in one convenient transmission.
