

FUSION Mail Option

Add Email as an output option to delivery report copies to your customers.

Complete rules-based configurations by physician accommodate everyone's needs.

Standard POP3 or SMTP mail delivery means no special email servers or third party software to buy.

User defined security ranges from standard MS/Word delivery to secure HTML with private key encryption.

Electronic Email Distribution

You can now offer email distribution of report copies to your physicians while matching their preferences and needs. FUSION Mail captures the power of your Physician Profile database and standard email platforms to offer the convenience of Internet email delivery with high security.

Rules-Based Provider Email

By account, report type and physician you can determine what report copies are sent via email. Physician's choose from standard printing, mailed reports, faxing or email to truly offer unmatched service for report delivery.

Standard POP3 or SMTP Integration

Use your existing POP or SMTP email delivery architecture as the backbone of this delivery option. Immediately upon report completion, the rule engages to create the email message with the report copy attached. Customize the email message text that accompanies the attachment.

User Defined Security

You determine the document format type. You can select from a standard MS/Word Document, a password protected MS/Word Document or even a highly secure HTML document with private key encryption.
